**DIOCESAN NEWS AND INFORMATION**

**April is Child Abuse Prevention Month**

**Did you know: You cannot always predict who will be an abuser?** Experience shows that most abuse is committed by someone who has gained the trust of a victim/survivor and his/her family. With child sexual abuse, 60% of the time the offender is a family friend, acquaintance, or another trusted adult in the victim/survivor's life. 30% of the time the offender is a family member. Sometimes an offender seems like the nicest person in the world, but this is often part of a process they use called "grooming" in order to gain the trust of the child they wish to abuse and the trust of his/her family.

**Did you know: There are behavioral warning signs of child abusers?** Training and education help adults recognize grooming techniques that are precursors to abuse. Some abusers isolate a potential victim by giving him or her undue attention or lavish gifts. Another common grooming technique is to allow young people to participate in activities which their parents or guardians would not approve, such as watching pornography, drinking alcohol, using drugs, and excessive touching, which includes wrestling and tickling. It is also critical to be wary of age-inappropriate relationships in the adult who is more comfortable with children than fellow adults.
